

Confined Spaces in Construction: Do's and Don'ts

Exercise

Directions: Next to each statement, write either “DO” or “DON’T” based on whether the statement follows proper procedures for permit-required confined spaces.

1. Perform periodic or continuous monitoring of atmospheric hazards. _____.
2. Inform the rest of the entry team when conditions change. _____.
3. Enter a confined space as soon as you notice an entrant needs medical help. _____.
4. Check that the entry permit details what tests, procedures, and equipment are needed. _____.
5. If lightheaded, speed up your work so the job is done as soon as possible. _____.
6. Always attempt an entry rescue first, then notify the rescue team. _____.
7. Keep at least one person outside of the confined space as an attendant. _____.
8. Before entry, make sure oxygen levels are as high as possible to maximize safety. _____.
9. Delay or cancel work if rescue teams are not available for possible emergencies. _____.
10. Allow an authorized entrant to simultaneously act as the attendant. _____.
