

## Lockout/Tagout

### Inspect Equipment for Energy Sources

#### Demonstration

For this learning activity, you will inspect an actual piece of equipment. Have the trainees locate all the energy sources. Give them several minutes to do this. Then, have a group discussion on the energy sources that they found. Make a list of these energy sources on a flipchart or writing board. Using the list, have a group discussion on how the energy may be isolated.

#### Target audience

Authorized employees

#### Preparation time

15 minutes to select piece of equipment and identify hazardous energy sources.

#### Training time

15 minutes to identify hazardous energy sources, 15 minutes to discuss the location of the isolating device and how it will be kept in place.

#### Materials required

Actual piece of equipment
