

## Respiratory Protection: Outline the Hazards and Controls

### Demonstration

**Objectives:** Use the SDSs for your products to explain the respiratory hazards faced by your employees. Outline the engineering controls that you have in place to help control the hazards associated with each product before you tell the trainees about the respirators that are required for the operations.

**Works Well With:** Departments or groups exposed to the same types of hazards.

**Preparation Time:** About 1/2 hour

**Materials Required:** SDSs
