

Respiratory Protection: Respirator Fit Tests

Demonstration

Objectives: At a separate meeting, conduct the respirator fit tests following the test protocols in the regulation. You may want to wait until you have the results from the employees' medical evaluations before you conduct the fit tests.

Works Well With: One employee at a time.

Preparation Time: One hour or more

Materials Required: Qualitative or quantitative testing equipment as outlined in the regulation's test protocols. (Qualitative testing will need odor threshold screening supplies, test chamber, test agents, etc.; quantitative testing will need calibrated sensing equipment, facepieces equipped with monitors, test chamber, etc.)
